SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Oroville Dam Auxiliary Spillway Incident

- Flow from the flood control spillway will be reduced from 40,000 cubic feet per second to zero.
- As flows are reduced, DWR will monitor the status of the dam, spillways, and related structures to ensure their continued safety and stability.
- Flow to the Feather River will be reduced gradually to minimize risk to downstream levees per the Army Corps of Engineers operational requirements.
- This flow reduction in the river will be buffered by the Hyatt Powerplant, Diversion Pool, Thermalito Forebay, and the Thermalito Afterbay to a final flow of 13,000 cubic feet per second.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 03/30/17 at 0600 hours](#):

- Inflow: [21,887](#) cfs.
- Outflow: [11,745](#) cfs.
- The current lake elevation is [839.07](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – Coordinating.
- 2017-SOC-31712: 2 Structural Engineers for evaluation of the Oroville Spillway Bridge (Butte County) – On Scene.

SITUATION SUMMARY

2017 February Winter Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Per the Cal OES Coastal Duty Officer (CDO) on 03/24/17:
 - With the bridge removed, the community of Big Sur is isolated, an estimated 450 people, in 3 different areas/enclaves.
 - Nacimiento-Ferguson Road might be open to the public to provide an access point to the east.
 - Plans for re-supplying locals and handling medical emergencies are in effect with operations that include an airdrop of fuel pods, groceries, pet supplies and livestock food,
 - Backup air medical transport plans have been developed and California National Guard assets have been secured for medical emergencies through Cal OES Law Enforcement Branch
 - The southern detour route was opened as of 03/13/17 to local traffic only.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Solano County: Sacramento River at Rio Vista

WEATHER OF CONCERN

Weather of Concern

- Gusty northerly winds are expected to impact portions of Southwest California Thursday into Friday.
- **Active Weather Warnings, Watches and Advisories by County:**
http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php - Temporarily unavailable. NWS is in the process of repairing the page.

WEATHER SYNOPSIS BY REGION

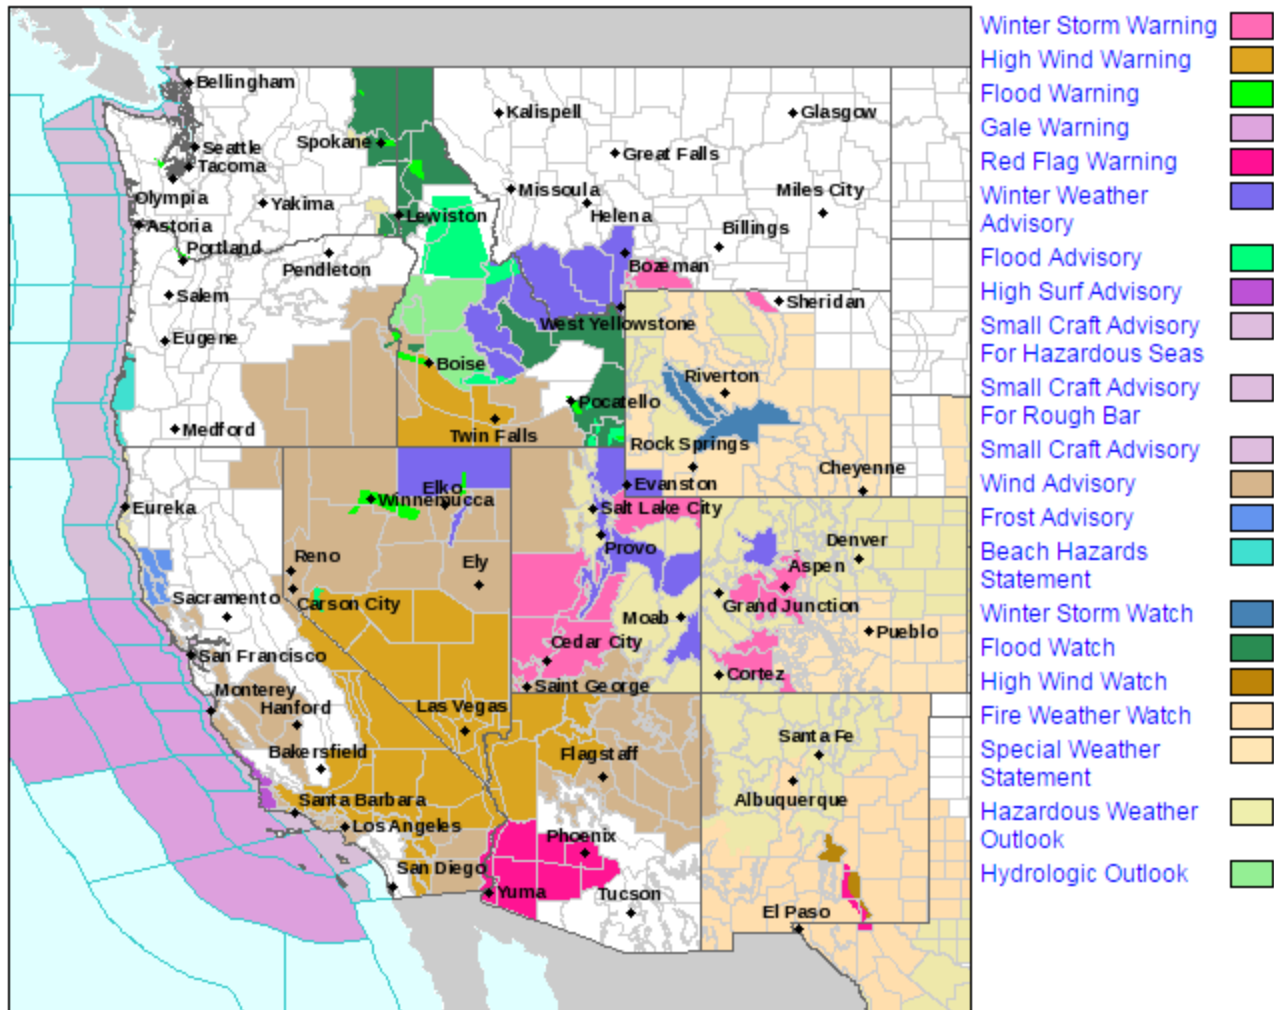

NORTHERN CALIFORNIA

High pressure will be arriving right behind this most recent weather system tonight with warm, dry conditions for Friday and Saturday. Although most areas will be sunny Friday and Saturday, there will also be some periods with quite a bit of high cloudiness, especially in the north. Sunday a low pressure trough is expected to arrive over the Pacific NW and Northern California, but there's still a lot of uncertainty about that system's precipitation potential. For now, it does appear that areas near the Oregon Border may see some light showers Sunday. Next Monday and Tuesday look dry and partly cloudy although some areas may become mostly cloudy Tuesday. Areas of relatively strong, gusty N to NE winds are likely to develop Thursday afternoon and last into early Saturday, especially for the Sacramento Valley and surrounding mountain locations. Sustained speeds mostly around 12-22 mph with gusts of 30-40 mph are expected. The lowest snow levels tonight and early Thursday will be around 4000 ft in the NW to around 6000 ft across the Sierra. Outside of Thursday and Saturday, the warmest inland areas will have afternoon high temperatures in the 70s over the next week. Highs there Thursday will mostly be in the 60s and in the lower 80s Saturday.

SOUTHERN CALIFORNIA

An area of low pressure will drop into Nevada from the Pacific Northwest today then move to the Four Corners Area Friday bringing significant cooling to the area. Isolated to scattered showers will form over the Sierra Thursday and the snow level will be between 6,000 and 7,000 feet. West to northwest winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes Thursday. These winds will become northwest to north and become focused from Santa Barbara County eastward to Los Angeles County as well as the Owens Valley and near the Colorado River Thursday evening through Friday morning. The winds will weaken and become less widespread starting Friday afternoon, but there will be localized gusty north winds through Saturday morning. A brief ridge will build into California from the Pacific Ocean bringing significant warming Saturday. Another area of low pressure will drop into the Great Basin and Four Corners Area from the Pacific Northwest Sunday through early next week bringing a cooling trend to the region. This low will bring strong west to north winds to the wind prone areas once again. There will also be isolated to scattered rain and snow showers over the Sierra Sunday night through Monday morning.
